In summary, an annex and an appendix are both forms of addendums to a main document. An appendix contains data that cannot be placed in the main document and has references in the original copy or file. An annex, on the other hand, is usually a standalone document that offers additional information than contained in the main document.. Looking at definitions, we get:

Then you prepare a file with your document and add all your annexures after the document from Annexure A to Z (or whichever is your last). The issue here is: I am referring to 30 Annexures in my document, however, in order for me to list all these documents as part of my index I have to manually go through the document and list each of them.
