What are the answers to Prime Time Factors and Multiples ...

Investigation 1 Building on Factors and Multiples: Investigation 1 is essentially the same as the Investigation 1 from CMP 2. The old 2.1 is now the new 1.4. Investigation 2 Common Multiples and Common Factors: Investigation 2 is Investigation 2 from CMP 2. The old 2.2 has moved to Inv. 4 as 4.1. Investigation 3 Factorizations: Searching for Factor Strings

Prime Time: Factors and Multiples - Connected Mathematics ...

Product is the answer to a multiplication problem. Multiples of a number are the “times table” answers for that number. For example - 7: 7, 14, 21, 28, 35 ... You can find them by multiplying or by continually adding the starting number over and over. The number itself is always the first multiple.

Prime Time (Factors and Multiples) - DMS Team 6B

The 2 distinct prime factors (listing each prime factor only once) of 12 are 2 and 3. The prime factorization of 12 is $2 \times 2 \times 3$ or, in index form (in other words, using exponents), $2^2 \times 3$.

What are the answers to prime time factors and multiples ...

Prime Number. A number that is only divisible by 1 and itself. For example, the number 2 is only divisible by 1 and by 2.

Composite Number. A number that is divisible by 1 and itself AND by other numbers. For example, 6 is a composite number because its factors are 1 and 6 AND 2 and 3.

Prime Time Factors and Multiples - Quizlet

Since the numbers are prime, they don't have any proper factors other than 1. Therefore, their least common multiple would be their product. Prime Time Practice Answers 10 Factors of 12
